INDEX

Absolute magnitudes of class M stars (Luyten), 488.
Absorption lines (Payne), 296, 399.
Absorption spectrum (Harris), 690.
Accuracy in physical measurements (Ruark), 322.
Acetylene, structure of (Morse), 645.
Acknowledgment (Bodewig), 894.
Action currents, retinal (Keeler, Sutcliffe and Chaffee), 811.
Active nitrogen (Kaplan), 258.
Adsorption kinetics (Burk and Gillespie), 470.
Agouti series of the house mouse (Dunn), 816.
ALBERT, A. A. Normal Division Algebras Satisfying Mild Assumptions, 904.
——. The Group of the Rank Equation of any Normal Division Algebra, 906.
Algal deposits of Unkar Proterozoic in Grand Canyon (White), 597.
Algebraic plane curves (Coolidge), 435.
Algebras (Albert), 904, 906.
Alkaline earth metals (Clark, King and Hyde), 617.
Allelomorph, fifth (Dunn), 816.
Ammonia, thermal decomposition of (Burk), 601.
Ammonium chloride (Rodebush and Michalek), 131.
ANDREWS, D. H. See Bates, J. R., 124.
Angles, Gudermannian complex (Kennelly), 839.
Angular distribution of radiation (Gurney), 946.
Angular scattering of electrons in hydrogen and helium (Harnwell), 564.
Anolis equestris (Hadley), 822.
Aorta, human (Bock, Bauer and Means), 675.
Aperiodic systems (Cassen), 880.
Argon, density, compressibility and atomic weight of (Baxter and Starkweather), 57.
Arithmetic, abstract (Ward), 907.
Association and polarization (Williams), 932.
Association of sodium vapor (Villars), 508.
Assortive mating (Wilson), 137.
Atmospheres, stellar (Payne), 399.
Atmospheric conditions and the radio (Merritt and Bostwick), 884.
Atomic weight of argon and neon (Baxter and Starkweather), 50, 57.
Atoms, birth of (Millikan and Cameron), 445.
Atoms, cadmium-like (Green and Lang), 706.
Aurora red line (Kaplan), 882.
Autoelectric field currents (Oppenheimer), 363.
AYRES, W. L. On the Separation of Points of a Continuous Curve by Arcs and Simple Closed Curves, 201.
Azomethane, decomposition of (Rice), 118.

Bands, Lyman (Kemble and Guillemin), 782.
Barometric pressure (Barus), 641.
BARRETT, C. S. The Scattering of X-Rays from Gases, 20.
BARUS, C. Experiments with Modified Mucronate Electrodes, 188.
——. Anode and Cathode Sparks Differentiated by the Mucronate Electrode, 248.
——. Sparks of the Induction Coil between Mucronate Electrodes, 465.
——. The Repulsion between Electric Currents and Their Induced Eddy Currents in Parallel, 542.
